

Mono Control Pleated Blind

Product Information

Verosol's **Mono Control Pleated Blind** combines the soft appeal of a curtain with the versatility and simplicity of a blind. An ideal blind for large areas over 3400mm wide, as a standard cord lock mechanism ceases to work effectively at this size, the Mono Control System avoids the need to revert to duct and cleat systems. Available using a continuous cord loop or stainless steel chain continuous loop.

Simple and elegant, with a small stack height and short projection, giving you an uninterrupted view from your home or office window.

Pleated Blinds with Guide Wires are a great idea when installing blinds on internal doors, as well as an ideal solution for boats and motor homes.

* When the maximum fabric segment width of 2200mm is exceeded, blinds will have two segments with an overlap in centre of blind. If you have a specific requirement to match wide width fabric to window mullions, please specify and detail this on your order.

** The maximum width of VeroCell fabric is 3000mm, the maximum drop of VeroCell fabric is 2700mm. VeroCell fabric cannot be joined, and cannot have fabric cut-outs.
