Verosol

Interior Blind Solutions

Our Story

1963

PRESENT

In 1963 Cornelis Verolme, the famous Dutch shipbuilder and founder of Verosol, sailed into New York Harbour. He marvelled at the impressive skyline and noticed that most of the buildings had large glass façades. He wondered how difficult it would be to manage the indoor climate.

This particular trip inspired Cornelis to find a solution to this problem. He began experimenting tirelessly with many ideas and concepts. This led to the creation of a new concept – the metallisation of fabrics, which would be used to manufacture blinds and curtains.

This new concept made it possible to reflect heat and glare outside the building. Regulating the heat and light creates significant energy savings as well as a much more comfortable environment for occupants.

This initial pioneering innovation led to the birth of the company we know today as Verosol, composed of the first four letters of Cornelis' surname VERO and the word SOL, meaning sun.

Our mission is to create, with our innovative and high quality blind solutions, a better environment in every building.

Inventors of Metallised Fabrics

Verosol invented the process of metallisation in 1963 and continues to set the unprecedented benchmarks. Our products' unique properties prevent heat absorption and light diffusion, offering unparalleled solar protection, comfort and view through.

Creators of a Better Environment

Verosol products have a major positive impact on energy savings, visual and thermal comfort and health. We create a better indoor environment with a significant increase in comfort for its occupants across homes and workplaces on a global scale.

Innovators on Functionality & Quality

Verosol continues to innovate and set new standards in the industry. We are constantly looking for new trends and developments to be translated into innovations.

Solar Control Solutions

Experience superior heat and UV protection without losing the stunning views

When it comes to sun protection at the window, Verosol is recognised globally as the industry leader. As the inventors of the metallisation process of fabrics, Verosol has over 50 years of knowledge and experience in developing the best solar control solutions – providing ultimate comfort without compromising the beautiful views outside.

Combined with quality and reliable blind systems, Verosol’s metallised solar control fabrics offer unparalleled performance, functionality and style in homes across Australia.

BEST PERFORMING FABRICS

INSULATION & ENERGY SAVINGS

Unfurnished windows have a major impact on the temperature of your home in both the warmer and cooler months. Verosol’s metallised fabrics provide the most effective insulation to your windows, significantly reducing heat loss in winter and heat gain in summer.

With Verosol you have maximum protection from the sun, independent of the colour fabric you select. The need for airconditioning and heating is significantly reduced, giving you considerable energy savings.

LIGHT CONTROL & VIEW THROUGH

Light control and view through are important considerations when selecting your blinds. Verosol offers a range of transparencies, giving you complete control of light. By using a metallised blind, you will eliminate glare from the sun, but still allow natural daylight to filter through and maintain an excellent view outside.

Harmful UV rays cause damage to furniture, wooden floors and soft furnishings. With Verosol’s metallised blinds, you can protect and prolong the life of these items.

PRIVACY FOR DAY & NIGHT

Each room in your home will have different privacy requirements. The range of transparencies available means you will be able to tailor a blind solution for each room. With selected transparencies, the unique feature of metallised blinds allows you to enjoy the outside view without compromising daytime privacy.

For night time privacy and room darkening, select a Blockout fabric for complete privacy. Twin Blinds allow you to select two fabrics, for both daytime and night time privacy.

VEROSOL FABRIC COLLECTION

SilverScreen

SilverScreen is the ultimate solution for heat, light and glare control. It provides the highest solar reflection levels on the market at 83% with an excellent view through. An ideal solution for reducing heating and cooling requirements, and for energy savings.

Originals

The Originals Collection features 4 transparencies and 36 vibrant colours in each transparency, making it one of the most versatile metallised fabrics. An excellent solution for managing heat and light, as well as your desired privacy levels.

Decorative

To complement Verosol’s range of solar control fabrics, we also carry a large collection of decorative fabrics. These fabrics can be used in combination with the solar control range to provide the best window covering solutions for your home.

Pleated Blinds

Option available with:
Standard Pleated Blind
Twin Pleated Blind
Skylight Pleat Motorised Blind
Mono Control Pleated Blind
Mono Control Battery Operated Pleat

Verosol

EUROPEAN DESIGN

HEAT & LIGHT CONTROL

Verosol's signature product. Pleated Blinds are the ideal solution for heat and light control. With minimal light gaps, Pleated Blinds effectively reduce glare, giving you a comfortable living and working environment.

Combine Verosol's Pleated Blinds with our metallised fabrics for superior UV and heat protection, keeping your home cool in summer and warm in winter. The Originals Fabric Collection offers a vibrant palette of 36 colours.

PRIVACY

The Twin Pleated Blind is extremely practical, giving you the option to select two fabrics. Select a sheer fabric to enjoy the daytime view with subtle light filtering, and select a blackout fabric for privacy and room darkening and insulation at night.

With the Duo Pleated Blind you have the option to raise the blind in the conventional way or from the top down towards the window sill, making it useful for when privacy is required down low but sunlight is required. Duo Pleats are ideal for bathrooms.

VERSATILITY

A major advantage of Verosol's Pleated Blinds is the availability of a vast range of different shapes and configurations to accommodate even the most obscure window.

Verosol offers a range of operable and non-operable special shaped blinds, including Conservatory / Skylight Pleats, Triangular, Circular, Arched and Fixed Frame Pleats. Custom shaped blinds for virtually any opening are available.

VeroCell Pleated Blinds

MOTORISATION

Option available with:

Standard Pleated Blind
Twin Pleated Blind
Mono Control Pleated Blind
Mono Control Battery Operated Pleat

Verosol

INSULATION & ENERGY EFFICIENCY

INSULATION

The unique honeycomb structure of VeroCell Pleated Blinds provides effective insulation for windows, keeping your home cool in summer and warm in winter. The cellular design traps air in the cells, creating an effective temperature transfer barrier between the window and the inside room, resulting in a comfortable indoor climate.

As well as energy savings, VeroCell Blinds are also ideal for heat and light control. The metallised backing protects furniture from harmful UV rays and eliminates glare, whilst still allowing natural light to enter.

PRIVACY

With a range of transparencies available, VeroCell Blinds give you full control of your desired privacy level. In rooms where complete privacy and room darkening is required, select the VeroCell Blockout. If vision out is not required, VeroCell Non Transparent allows light to filter into the room during the day, whilst providing a good level of privacy. Where a high level of privacy is not required, VeroCell Semi Transparent allows daytime view through and natural light in, whilst providing a subtle level of privacy.

FLEXIBILITY

VeroCell is available on most Pleat systems except Conservatory, Skylight and Special Shaped Pleats. The Twin system combines the functionality of two different fabrics, such as a Blockout and a Transparent fabric, giving you ultimate flexibility with control of light and privacy.

The Non Transparent and Semi Transparent feature two types of fabrics – one with a white backing giving a uniform look from the outside, and the second is coloured both sides for a decorative look from both inside and outside.

Inventors of the perfect shade

Roller Blinds

THE PERFECT VIEW

SLEEK DESIGN

Verosol Roller Blinds are not only designed to control heat and light entering your home, they have been designed to enhance the ambience of any room, adding a sleek, minimalistic look. Enjoy an uninterrupted view through to the outside with Verosol's metallised or Sheer fabrics.

With the wide range of fabric options available for Roller Blinds including decorative and solar control fabrics, you can tailor the look of your blinds to suit any interior space.

HEAT & LIGHT CONTROL

Select from a range of fabric transparencies including sheer, translucent and blackout to control the amount of light into the room and privacy. Where total light control is essential, such as home theatres or bedrooms, the Ambience Blackout system is ideal.

Select Verosol's unique metallised fabrics to enhance privacy and daytime vision outside – you can see out but no-one can see in. These fabrics also provide great insulation, keeping your home cool in summer and warm in winter, eliminate glare and protect your interior furnishings from harmful UV rays.

FUNCTIONALITY & SMOOTH OPERATION

The Mode Roller Blind provides a silky smooth operation even for larger blinds. The auto stop option automatically raises the blind to a pre-set stop position, perfect for hard to reach windows. The one touch raises the blind automatically with one touch of the chain.

The Ambience Roller systems are highly functional with multi-link and uni-joint options allowing you to operate a number of blinds simultaneously. The Twin system combines the functionality of two different fabrics, such as a Blockout and a Transparent fabric, giving you ultimate flexibility with control of light and privacy.

Option available with:
Ambience Roller Blind Systems
Ambience Battery Operated Roller
Ambience Twin Battery Operated Roller

Hardwood Shutters

Verosol

BEAUTY & ELEGANCE

QUALITY TIMBER

Verosol Hardwood Shutters are made from 100% sustainably sourced timber. Painted Shutters are made from Poplar, an even-grained timber, with a fine texture and flawless finish. Stained Shutters are made from premium hand-selected basswood, selected for its even grain and light colour.

Made from quality materials, Verosol Shutters are highly durable and provide timeless style. They show enduring craftsmanship compared to synthetic alternatives available.

PAINT OR STAIN OPTIONS

With a versatile range of high quality paint or stain options, Verosol Shutters will complement any home interior. Painted Shutters beautifully create the classic look, and are finished in quality 2-pack polyurethane paint.

Stained Shutters are available in a range of popular stains, and the indistinct grain enhances the colouring process for superior consistency in finish, giving a rich, luxurious feel.

CUSTOMISATION

Verosol Hardwood Shutters are custom made to fit a wide range of different sized and shaped windows, making it a highly versatile option. Select from a range of special shapes and configurations such as Arch, Half Arch, Triangle, Oval or French Door.

Verosol Hardwood Shutters are available in three different elliptical blade sizes – 64mm, 89mm or 114mm, each giving a different look to suit your home.

Inventors of the perfect shade

Aluminium Shutters

Verosol

EXCELLENT DURABILITY

QUALITY & ELEGANCE

Verosol Aluminium Shutters are constructed with beauty, durability and versatility in mind. They allow you to combine indoor and outdoor living with shutters that are built to last through all weather conditions. Compared to many lower quality aluminium shutters on the market, the 1.4mm marine-grade aluminium alloy offers unsurpassed strength and resistance to rain and sun.

COLOUR RANGE

Perfectly match your decor with a range of standard powder coat colours as well as timber grain veneers. Verosol can also colour match your shutters to any colour from the Dulux World of Colour Fandek, giving you ultimate customisation. All powder coating uses a high quality liquid backed enamel paint to give a superb finish.

Alternatively, keep the natural look and feel of a timber finish with the range of timber grain finishes, offering increased durability and easy maintenance.

CUSTOMISATION

Verosol Aluminium Shutters are available in a range of application types, from multi-fold and hinged, to sliding and fixed. These flexible options provide non-obstructed views, privacy and maximisation of living space.

Verosol Aluminium Shutters are available in three different elliptical blade sizes – 64mm, 89mm or 114mm, each giving a different look to suit your home.

Inventors of the perfect shade

Roman Blinds

CLASSIC OR CONTEMPORARY

TIMELESS ELEGANCE

Whether you are looking to create a classic or contemporary look, Roman Blinds are a perfect solution. They provide the soft appeal of a curtain with the simplicity of a blind.

Verosol Roman Blinds are easy to operate, with the choice of the Cascade chain control or Mode motorised. With its clean lines, the Roman Blind provides a sleek and modern appearance with a large range of fabric options available.

PRIVACY & INSULATION

Roman Blinds offer great control of privacy, giving you a beautiful uninterrupted view when raised, or complete privacy when drawn. The options of a range of fabric transparencies also offer further control of light and privacy.

In summer, Roman Blinds help keep the room cool, especially when using Verosol's metallised fabric. Whilst in winter, they provide good insulation as they reduce the amount of heat escaping through windows, making the Roman an energy efficient blind all year round.

FABRIC OPTIONS

A wide range of fabric options are available, making the Roman Blind a versatile solution for any interior. The large variety of decorative fabrics and colour palettes means it will be easy to coordinate the blinds with the decor of your home or office.

Verosol's unique high performance fabric SilverScreen is also suitable for use on Roman Blinds. The metallised backing of this fabric offers unparalleled UV protection for your interior furnishings, as well as providing effective insulation and excellent vision out.

Option available with:
Mode Roman Blind

Verosol

Inventors of the perfect shade

Venetian Blinds

STYLISH & FUNCTIONAL

LOW MAINTENANCE & DURABILITY

Verosol's Streamline Venetian Blinds are a great low maintenance and highly durable option for window coverings. They are made from roll formed aluminium rails and slats that are stove enamelled for extra strength and corrosion resistance.

Maintaining and cleaning your Venetians is easily done with an occasional dust with a feather duster or wipe with a damp cloth. This means they are an ideal solution for rooms such as kitchens, bathrooms or laundries.

COMPLETE LIGHT CONTROL & PRIVACY

Venetian Blinds offer practical light regulation and privacy control. Control the amount of sunlight entering the room with the ability to adjust the angle of the blades from completely open to completely closed. By adjusting the blade angles, you can achieve high levels of privacy, yet still allowing natural light to filter through.

You can also draw the blinds all the way up for an uninterrupted view. These options make the Venetian a highly versatile blind for controlling light and privacy.

COLOUR OPTIONS

With a streamlined look, Venetian Blinds add a stylish, contemporary touch to a room. Choose from a wide range of colour options to make a bold statement or create a relaxed feel to blend in with your home decor. There are also a range of finishes available such as metallic and matte.

Streamline Venetians are available with a variety of control options including Mono Control.

Option available with:
Streamline 25mm Venetian Blind

Inventors of the perfect shade

Panel Glides

LIGHT CONTROL & PRIVACY

A wide range of fabric options is suitable for use with Panel Glides, including decorative fabrics and several of Verosol's metallised collections. Metallised fabrics provide excellent heat and UV protection, keeping your home cool in summer and warm in winter.

Have complete control of your privacy and the amount of light entering the room, by selecting from a range of Transparent or Blockout fabrics. The fabric panels overlap to eliminate light gaps.

FUNCTIONALITY

Combining the elegance of curtains with the functionality of blinds, fabric panels fall vertically from the track giving the soft look and feel of a curtain. Panel Glides are ideal for sliding and bi-folding doors or large span windows.

A range of track configurations provides varied options for the stacking of fabric panels to the right, left or centre. The Panel Glide system track can be operated by wand or cord, and is extremely easy and smooth to operate.

luxury & convenience

Motorisation

COMPLETE CONTROL

Experience greater convenience and luxury in your home with Verosol's motorisation options for your blinds. Motorisation makes operating your blinds easy, eliminating any cords or chains. Have complete control of the light in a room with the touch of a button.

Motorisation is ideal for large or hard to reach windows. Verosol offers the latest technology in blind motorisation, with different options available to suit your home and lifestyle.

CHILD SAFETY

Cords and chains on blinds can be a hazard to children. Child safety is very important to Verosol, and that's why all Verosol blinds are installed with a child safety device. However with motorisation, you can have complete peace of mind when it comes to your child's safety, as it eliminates the need for any cords or chains.

Home Automation Systems

Verosol offers a large range of motorisation and control solutions using the latest technology compatible with home automation and building management systems.

Remote Control Range

A range of remote control options provides easy programming, allowing you to manage individual blinds or a group of blinds simultaneously.

Wall Switch Range

Wall switches are practical for controlling the opening and closing of blinds. With a wireless option and a range of colours available, the wall switch is easy to install and will match any interior.

Indoor Sun Sensor

Automate the raising and lowering of your blinds according to the amount of sunlight in a room with a wireless sun sensor, easily mounted onto the inside of your window or window sill.
