

Transparencies & Opacity Guide

The colour you choose is important when it comes to matching decor and interior styles, but what you really have to take into consideration is the opacity levels of the fabric. What we mean by opacity is how much light can pass through the material. We have created the following guide to assist you with selecting a suitable opacity for your windows.

No Blind

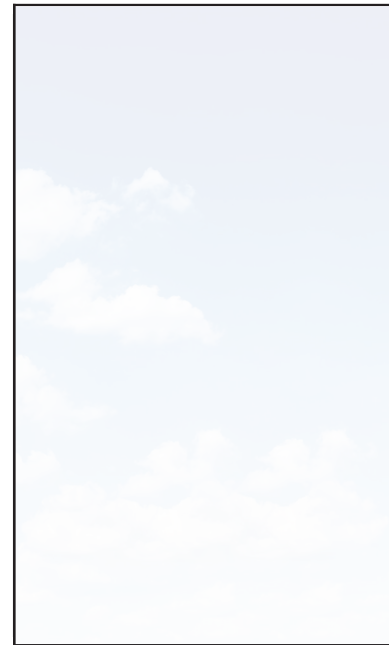

Transparent

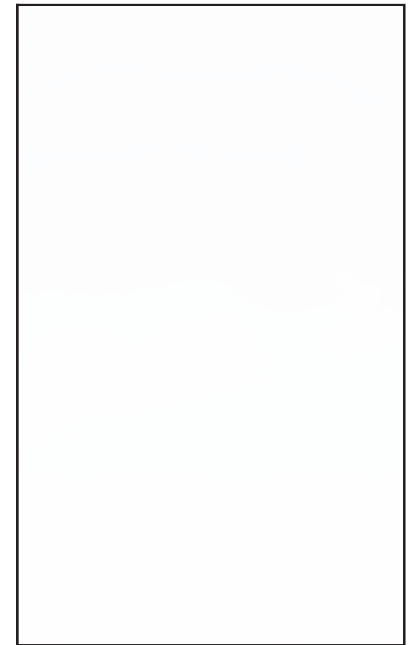

Semi Transparent

Non Transparent

Blockout

Transparent

A clear view through the fabric including the colour, shape and depth of field of objects

Semi Transparent

A good view through the fabric with the colour of objects starting to be lost but objects through the view are still identifiable

Non Transparent

Only light is being diffused through the fabric. Almost all objects are unidentifiable except for perhaps a brief outline

Blockout

No light is penetrating and complete privacy is achieved with no view of the outside environment

Fabric Price Group Reference

EXTERNAL FABRICS			
Fabric Name	Density	Width (mm)	Price Group
787 Infinity	Trans	3200	1 + 10%
297 Soltis 86	Trans	2670	1 + 5%
298 Soltis 88	Trans	2670	1 + 5%
284 Soltis 92	Trans	2670	1 + 10%
286 Soltis 96	Trans	2670	1 + 5%
785 Sunworker OPEN	Trans	3000	1 + 5%

How to apply fabric surcharge to External Blinds

Surcharge applies to the base price grid **only**. It does not apply to Headbox, Side Channels, Powdercoating, Motors, or Accessory charges.

Example Only: **Veromax** External Guidewire Roller Blind System - **Motorised [Sonesse RTS Motor]**

2000mm (w) x 2000mm (d)

Fabric: 785 Sunworker OPEN [Add 5% surcharge]

Base Price: \$ 1,162.00 RRP

5% Surcharge: \$ 58.10 RRP

Motor: \$ 900.00 RRP [Sonesse RTS Motor]

Total: \$ 2,120.10 RRP

Should any additional configuration items be required (Headbox, Side Channels, powdercoating, Motors or Accessories), then these are added to the total.

Note: Non swatched fabrics may have various rail road + join positions. Please contact Customer Care for more information.
