EXTERNAL BLINDS

Improve your outdoor living

OUTDOOR LIVING

Verosol Ambience & Veromax External Blind systems provide seamless integration of indoor and outdoor entertaining areas. Not only do they ensure privacy and comfort, they're ideal for enclosing alfresco areas, outdoor patios and balconies, whilst offering protection from the elements.

Our External Blind solutions for shading and screening are incredibly versatile, fitting most standard and oversized applications. So practical, they can supply full ventilation, shade from the sun, protection from weather, pests and enhance privacy at the touch of a button.

DESIGNED TO PERFORM

Verosol External Blinds have many unique features to simplify installation, improve reliability and provide the performance necessary to function for years to come. Placing high importance on aesthetics, slim and compact fittings are designed to integrate sleekly with any style of architecture.

Available in a variety of control options, our External Blinds are capable of wide spans and long drops. Interchangeable components make Verosol External Blinds the perfect customised solution for outdoor comfort shading.

STRUCTURE & INTEGRITY

Verosol's External Blind systems are manufactured from the highest quality materials that includes stainless steel, glass-filled nylon and extruded aluminium. The components are complimented by high-performance external fabrics, which control light, heat and solar radiation.

Verosol External screens will extend your outdoor living, providing comfort and insulation, all delivered with the security of a trusted brand.
