

A4510 Series Curtain Track

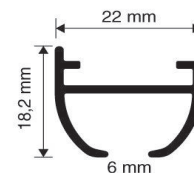

Product Information

The Verosol **A4510 series track** is a sleek rounded profile suitable for top, recess or face mount. The profile when installed is designed to look the same from both inside and out. Suitable for radial bends this track can create organic shapes, curves and corners.

Selecting the right curtains requires pairing two elements: drape and track. When selecting Curtains, you will need to consider the functionality and combination of fabrics including the header types and tracks for the space.

Drape selection should take into consideration the heading style of the curtain and finished look. Track selection will depend on installation requirement and drape fullness. Various fabrics and track combinations can provide thermal, acoustic and ambience to any room.

Our team of curtain and blind experts are available to assist you in making the right choice for your needs.
