

A2055 Series Curtain Track

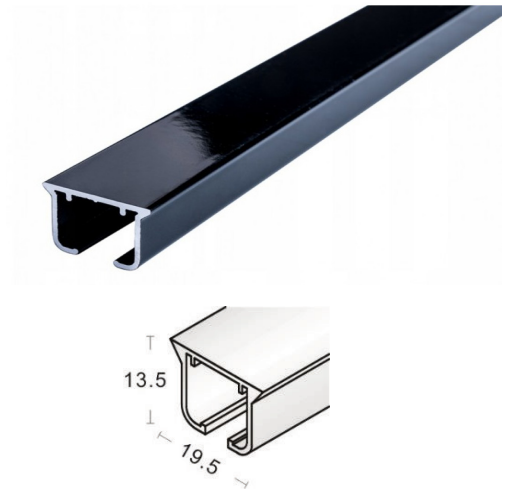

Product Information

The Verosol **A2055 series track** is a slimline track designed for easy installation. The A2055 profile suitable for top or face mounting. Track is suitable for bending with a minimum bend radius of 150mm. Due to the slim track design it suitable for both residential and commercial applications where dual tracking is required.

Selecting the right curtains requires pairing two elements: drape and track. When selecting Curtains, you will need to consider the functionality and combination of fabrics including the header types and tracks for the space.

Drape selection should take into consideration the heading style of the curtain and finished look. Track selection will depend on installation requirement and drape fullness. Various fabrics and track combinations can provide thermal, acoustic and ambience to any room.

Our team of curtain and blind experts are available to assist you in making the right choice for your needs.
