

DAY 2 SERVICES

“The true meaning of excellence isn’t just how we start, but how we stay the course. Day 2 is where lasting value is built.”

Verosol

Day 2 Services by Verosol

Introduction

Verosol ensures ongoing maintenance and optimisation of shading solutions beyond project handover. Initially designed to support Verosol products, our services now extend to any building with any shading, automation or BMS system.

Comprehensive Support for Any Building

Driven by the needs of property owners and facility managers, Day 2 Services are designed for buildings of all types and technologies. We help clients protect their shading system investments while enhancing building comfort and performance.

Our Service Offering

Services are delivered in two integrated parts to support both immediate needs and long-term outcomes.

Part A – Building Shading System Audit

A detailed assessment of your existing systems including:

- Building cataloguing & asset register
- Shade functionality evaluation
- Operational risks and failure points
- Control & automation audits
- Improvement opportunities and future-proofing strategies

This audit delivers actionable insight from an industry-leading Australian manufacturer.

Part B – Planned & Preventative Maintenance Agreement (PPM)

Following the audit, we provide a tailored maintenance plan that includes:

- Scheduled maintenance & repairs
- Incident response protocols
- System performance monitoring
- Optimisation and tuning
- System updates and upgrades
- Staff training and support
- Long-term optimisation strategies

PPM provides peace of mind through continuous care of your building's shading systems.

Why Day 2 Services Matter

- **Sustainability:** Long-term efficiency and reduced environmental impact
- **Occupant Well-being:** Improved comfort and safety
- **Cost Savings:** Preventative care reduces expensive repairs
- **Future Readiness:** Adapt to new demands and technologies

**“What you build on Day 1 matters.
What you nurture on Day 2 makes it last.”**

Why Choose Verosol

Sustainability:

Verosol supports high-performance, energy-efficient environments with long-lasting products, supported by a **take-back program**, no waste to land-fill program, and carbon positive manufacturing facility.

Design Freedom:

Our **extensive product range** integrates seamlessly into all architectural styles.

Performance & Innovation:

Backed by cutting-edge solar control technology and **local manufacturing**.

Technical Assurance:

Delivered by **experienced** engineers and technicians who understand every system.

Client Confidence:

Proven success with leading Australian commercial buildings.
