Summary

Building faced North over the harbour, exposing its facades to excessive glare. Building to house a number of prospective high profile Commercial tenants. Required a fabric that delivered quality glare control & view out in a variety of colours to suit individual interiors without compromising the building's external appearance. Fabric with a backing that maintained building appearance, but offered interior colour choice and delivered superior heat & glare control for building occupants.

Benefits of Verosol

Verosol spring assisted chain operated Mode Roller complete with Verosol's range of Metal backed Trevira CS roller blind fabrics.
