Summary

Building was refurbished to attract new tenants after long standing RTA occupancy. The Investa building is open to all aspects of the sun, west, north and east being the most problematic, where heat and glare are an issue. Occupant comfort was taken into consideration for this project.

Benefits of Verosol

Solution: EnviroScreen 802 has a shading co-efficient of approximately 18%, which will provide the heat and glare solution for this project. EnviroScreen 802 also allows vision out for the occupants. Verosol ambience roller blinds provide a robust blind hardware system suitable to all commercial applications.
